EDUCATION

LEARN Academy, San Diego, CA (remote)

Oct. 2023 - Feb. 2024

Full-Stack Web Development Bootcamp

- 640 hours of individual, pair, and mob programming
- 4 projects, both static and full-stack via React and Ruby on Rails frameworks
- Foundational knowledge of HTML/CSS, Javascript, and Ruby

Catawba Valley Community College (CVCC), Hickory, NC

Sep. 2015 - May. 2017

Welding Technology Certification

PROFESSIONAL EXPERIENCE

San Diego Startup Map

Jan. 2024 - Feb. 2024

React/Rails Development Intern

- Spearheaded the complete rebuild of the SDSM Ruby On Rails web app, working effectively in a team of 5 to build database tables, admin console and user UI with the installation and configuration of Ruby gems and Tailwind CSS styling.
- Assisted in elevating user experiences by adding, updating, and upgrading front-end features, ensuring a seamless and visually appealing interface for optimal user engagement.

U.S. Marine Corps

Oct. 2017 – Oct. 2023

Field Radio Operator

- Supervised 10+ Marines in the erection, programming, and maintenance of various antennas and radio systems, often with NSA level encryption
- Maintained an inventory of radios, antennas, and their peripherals valued at \$4 million
- Regularly operated multiple radio nets to pass communication between infantry units, aircraft, and artillery with necessary command elements while maintaining/repairing equipment

Kooks Headers, Statesville, NC

Feb. 2021 – Jan. 2022

TIG Welder (Production and Fabrication)

- Built header and exhaust systems for NASCAR and 25+ car models from top manufacturers like Ford and Chevy
- Fulfilled 3-5 work orders at a time on a typical 10 hour day without sacrificing quality
- Due to my own abilities and my ability to communicate effectively with my production team our output increased by more than 60%
- Trained 10 new hires in proper preparation, welding, and repair techniques to meet quality requirements and production expectations
