EDUCATION

LEARN Academy, San Diego, CA (remote)   Oct. 2023 - Feb. 2024
Full-Stack Web Development Bootcamp
- Successfully completed 640 hours of individual, pair, and mob programming, leveraging the power of teamwork in a development environment
- Designed, developed, and deployed 4 projects, both static and full-stack via React and Ruby on Rails frameworks
- Developed working knowledge of HTML/CSS, Javascript, Ruby, and Reactstrap
- Utilized Notion and Trello boards for team and project management
- Leveraged APIs in full-stack applications to provide innovative user functionality

Catawba Valley Community College (CVCC), Hickory, NC   Sep. 2015 - May. 2017
Welding Technology Certification
- Studied and practiced multiple welding processes in multiple positions to meet blueprint/assignment specifications
- Utilized a wide range of power, hand, and hydraulic tools to cut, bend, and shape metal
- Worked with carbon steel, aluminum, and stainless steel

PROFESSIONAL EXPERIENCE

San Diego Startup Map   Jan. 2024 - Feb. 2024
Ruby on Rails Software Engineer Intern
- Updated Sprockets, ActiveAdmin, Select2, and other otherwise outdated Ruby gems to provide a consistent user experience
- Spearheaded the complete rebuild of the SDSM Ruby On Rails web app, working effectively in a project team of 5 to build database tables, admin console and user UI with the installation and configuration of Ruby gems and Tailwind CSS styling
- Assisted in elevating user experiences by adding, updating, and upgrading front-end features, ensuring a seamless and visually appealing interface for optimal user engagement
- Employed APIs to further user experience and provide admin support to user location

U.S. Marine Corps   Oct. 2017 – Oct. 2023
Field Radio Operator
- Supervised 10+ Marines in the erection, programming, and maintenance of various antennas and radio systems, often with NSA level encryption
- Maintained an inventory of radios, antennas, and their peripherals valued at $4 million
- Regularly operated multiple radio nets to pass communication between infantry units, aircraft, and artillery with necessary command elements while maintaining/repairing equipment

- Oversaw the inventory, maintenance, setup/teardown, and programming of Long Range Systems (LRS) equipment and two designated teams of 5 Marines who were in charge of each LRS set

Kooks Headers, Statesville, NC   Feb. 2021 – Jan. 2022
TIG Welder (Production and Fabrication)
- Built header and exhaust systems for NASCAR and 25+ car models from top manufacturers like Ford and Chevy
- Fulfilled 3-5 work orders at a time on a typical 10 hour day without sacrificing quality
- Due to my own abilities and my ability to communicate effectively with my production team our output increased by more than 60%
- Trained 10 new hires in proper preparation, welding, and repair techniques to meet quality requirements and production expectations

Certifications

Secret Security Clearance   Oct. 2017 - Oct. 2027
United States Marine Corps Reserve

Full-Stack React/Ruby on Rails Web Developer   Oct. 2023 - Feb. 2024
LEARN Academy
